## Company Profile

### About us

The first Hyderabad office was opened 2004 and since this time Techno I have developed a strong, trustworthy reputation for quality and reliability in the field of Technical Services & Trainings.

Techno I is committed to using best practice knowledge and global experience and takes a proactive continuous improvement approach to broaden and enhance the services to Clients.

Our representation enables localised service at consistent standards.

Our strengths are underpinned by a global infrastructure, a highly skilled and experienced workforce, and a diverse range of quality Trainings and services.

Techno I business unit, which provides Electronics security Trainings and solutions

Techno I Security Systems services has developed a reputation for its high standards. It is company policy to offer equipment and services of the highest quality and reliability. This is backed up with specialist design, technical training and consultancy advice.

Features that ease installation and maintenance are incorporated into the equipment selection and with careful design, rigorous testing and strict quality control ensure that our systems meet and exceed the specified parameters.

These systems include but are not limited to:

- **CCTV (CLOSED CIRCUIT TELEVISION)**

Security systems: Protecting human lives, assets and facilities Techno I installs, integrates, and maintains the systems that keep facilities secure, comfortable and productive. Our security systems Encompass communication and information technologies for enhanced lifestyles. We offer solutions for intrusion and property protection, access control, video surveillance, anti shoplifting and intercom systems.

- ACCESS CONTROL SYSTEM

Control systems: Comfort, cost and energy saving through intelligent buildings Techno I designs and installs hardware and software to meet digital control requirements for heating, ventilating, air-conditioning, lighting, and security, integrating the different applications into a single, unified and user-friendly front-end interface. We offer scalable solutions for homes, corporate offices and retail outlets.

- FIRE ALARM SYSTEM

Fire systems: A danger free environment through reliable technology Techno I undertakes turnkey projects in fire detection, alarm, emergency evacuation system. Our capabilities cover in-house design, installation, inspection and maintenance for new and existing systems.

- **EPBAX & INTERCOM**

Intercom in residential, multi-family and commercial applications. Our products can be installed as new systems, or by retrofitting existing systems. True to the design philosophy of innovation, intelligence and superb technology, all Techno I products conform to our quality, flexibility and timeless design standards.

- **INTRUDER ALARM SYSTEM**

Home security is top priority of all concerned. Today there are plenty of home security products to ensure your family's security completely. Home security is the most significant one for every homeowner either in an individual house or an apartment. To get the absolute peace of mind whether you are at first time home or out of home you must ensure that your home is installed with the perfect home security monitoring system. Home security system using security cameras is the best way to protect your family and your belongings.

- **PUBLIC ADDRESS SYSTEM.**

The Techno I of public address equipment is specifically designed for small to Large sized PA applications, from one to N zones. The digital message manager and CD tuner, brings near CD audio quality to business and emergency messages. Feedback problems in poor acoustic areas can be easily solved, ensuring your amplified speech is clearly heard by your audience. Larger scale applications once only feasible with expensive sound management systems are well within the range of the Techno I PA. With only a few units, a wide variety of configurations can be built to suit any application.

### **System Design**

Techno I technical resources include engineers who have designed security systems to protect valuable personnel and property. This wealth of expertise encompasses professionals with wide ranging industry and geographical experience:

- Threat Assessment
- Vulnerability analysis
- Risk Management
- Security Planning
- Conceptual Design
- Operating and Contingency Planning

Our Security System designs proceed from an understanding that it is first necessary to know what is to be protected and why, before a valid security system design is possible. It is our policy to involve the customer in every phase of system design, so ensuring that he is familiar with the rationale behind equipment selection.

### **Engineering**

Based on the approved threat profile, Techno I engineering provides final systems design and equipment selections. Techno I has no hardware affiliations and is, therefore free to select the best equipment for each individual application. We have CAD capability and can produce construction documentation to tight time schedules and can also produce all the detailed engineering for an in house security system.

### **Project Management**

Performance to time and cost is essential to the successful completion of a security system project. Techno I is familiar with all the basic project control mechanisms and costing procedures, and is capable of integrating them. We will appoint a Project Manager for each security system project it undertakes. The Project Manager is a senior member of the technical team who is empowered to take all actions precedent to the successful completion of a project.

### **Maintenance**

Security Systems are not immune to breakdown. Abuse or mis-use affects even the most sophisticated electronic equipment and as a result, proper maintenance is required for it to operate reliably and at peak efficiency. Our reputation as the leader in security is your assurance that when it comes to maintenance and service of your system. Techno I has in-depth knowledge and expertise gained from years of product innovation and development within the security industry. We have carefully analyzed the service needs, both of our equipment and our customers.
